

Retail Enterprise Analytics

Olist E-Commerce Analytics Dashboard

Business Goal

Develop an executive dashboard that enables stakeholders to monitor sales performance, product performance, customer satisfaction, payment behavior, and delivery operations to support data-driven business decisions.

Dashboard Sections

Executive Sales Overview

Business Question

How is the business performing overall?

Product Performance

Business Question

Which product categories generate the highest revenue?

Customer Analytics

Business Question

How satisfied are customers with their purchases?

Delivery & Operations

Business Question

Are orders being delivered within an acceptable timeframe?

KPIs

- Total Orders
- Total Payment
- Total Revenue
- Average Order Value
- Orders / Customers
- Average Delivery Days
- Average Review Score

Design Considerations

The Olist dataset contains transactional data for March 2018 only. Because there is no historical data available, the dashboard emphasizes cross-sectional analysis rather than time-series trends. The focus is on identifying revenue drivers, customer behavior, payment preferences, and geographic performance within the available snapshot.

Dashboard Visuals

1. Revenue by Category

Purpose: Identify the product categories generating the highest revenue.

Visual: Clustered Bar Chart

Fields:

Y-axis: `product_category_name`

X-axis: `[Total Revenue]`

2. Top 10 Products by Revenue

Purpose: Identify the highest revenue-generating product categories.

Visual: Stacked Column Chart

Fields:

X-axis: `product_category_name`

Y-axis: `[Total Revenue]`

Tooltip: `Revenue Share %`

Shows the percentage contribution of each product category to total revenue.

Business Interpretation: Measures how much each product category contributes to overall company revenue.

Revenue Share % =

```
DIVIDE(  
  [Total Revenue],  
  CALCULATE([Total Revenue], ALL(Fact_Order_Items)) )
```

3. Revenue by State

Purpose: Visualize revenue distribution across customer locations.

Visual: Map

Fields:

Location: `customer_state`

Values: `[Total Revenue]`

4. Payment Type Analysis

Purpose: Analyze customer payment preferences and the revenue generated by each payment method.

Visual: Pie Chart

Fields:

Legend: **payment_type**

Values: **Sum(payment_value)**

Tooltip: **Payment Share %**

Business Insight: The majority of revenue is generated through credit card payments, while alternative payment methods contribute a significantly smaller share.

Payment Share % =

```
DIVIDE(  
    SUM(Fact_Payments[payment_value]),  
    CALCULATE(  
        SUM(Fact_Payments[payment_value]),  
        ALL(Fact_Payments)    ))
```

5. Review Score Distribution

Purpose: Evaluate overall customer satisfaction.

Business Insight: The distribution of review scores helps identify overall customer sentiment and highlights whether most customers report positive purchasing experiences.

Visual: Column Chart

Fields:

X-axis: **review_score**

Y-axis: **[Total Reviews]**

6. Revenue Share by Category

Purpose: Compare each product category's contribution to total revenue.

Visual: Area Chart

Fields:

X-axis: **product_category_name**

Y-axis: **Revenue Share %**
